INTRODUCTION

Introduction

This report summarizes and comments on the results of our operations for the 2024 fiscal year.

In this year we saw a return to more normal investment results despite the turbulence that continued to affect the markets. This is a direct reflection of the conservative nature of our investment portfolio. The value of our investment portfolio increased from an opening amount of \$4,012,044 to a year-end value of \$4,404,199 representing an increase of \$392,155 even after withdrawals amounting to \$260,000 to cover our benefit payments.

Asset Management

We are assisted in managing our invested assets by Wade VanBostelen of Investment Planning Counsel in Burlington, Ontario and we usually meet with him each year to review and discuss our investment portfolio. Immediately following the fiscal year our investment portfolio was transferred from Scotia Wealth Management to IPC Wealth Management.

I am able to report that all investment matters have been handled in accordance with our established long-term investment policy and there have been no issues that required our attention.

Our cash reserves continue to be tightly managed because a portion of the funding for the benefits that we pay out is covered by making periodic withdrawals from our investment account. In the 2024 fiscal year 19.3% of our benefit payments were covered by such withdrawals

Benefits and Assessments

During the year the number of members that were receiving benefits increased by 2 to a total of 28. As of the end of the year we were distributing benefits in respect of 36 (2023 = 34) retired ministers and widows. During 2024 benefits began in respect of Rev J Huijgen and Rev D Wynia.

In the year the benefit rates were increased by 3.1% (2023 = 6.9%) based on the annual change in the Canadian Consumer Price Index as announced for the month of October. The assessment rates were increased by 4.5% (2023 = 4.8%) calculated based on the annual 20-year cash flow projection. Based on several assumptions, including the assumption that our assessment rate increase will be 2% annually in the future we calculate that the Fund will have sufficient funds on hand to meet projected responsibilities beyond the year 2044. A key assumption concerns the life expectancy of the retirees; this is currently under review by the management committee and it may be necessary to increase the rate of assessments in future years beyond the current rates to account for the fact that the general population is living longer than in the past.

With respect to assessments, the Fund's policy is to increase assessments based on a 20-year cash flow projection and is designed with the objective of maintaining a positive cash balance throughout that period. The percentage of change is applied in the following January of each year.

INTRODUCTION

Respectfully submitted,

S.P.C. Vander Molen, CPA, CA
Management Committee Treasurer

NOTES TO FINANCIAL STATEMENTS

Notes to Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Preparation of Financial Statements

These financial statements have been prepared by and are the responsibility of management. They have been prepared using Canadian accounting standards for not-for-profit organizations.

Recognition of Investment Income

The Fund recognizes investment income as it accrues to the Fund's benefit. Increases and decreases in the market value of investments are recorded in the accounts at the end of each fiscal year.

Liability for Future Benefits

Under the terms of its constitution and by-laws the Fund is obligated to make payments to its constituent members in respect of retired ministers or their widows. The Fund does not record in its accounts the potential liability to its members for such benefit payments because its primary role is as a facilitator on behalf of its members and, as such, considers that it is merely a redistributor of the funds it collects and earns on behalf of its members.

2. INVESTMENTS, at market value

	2024	2023	2022
Marketable securities held in brokerage accounts			
Fixed income products, including GIC's	\$ 809,564	\$ 1,176,481	\$ 1,169,035
